

This represents an example of only a few areas parent should consider. Other areas where present levels should be addressed can include: social skills, handwriting, grammar, motor planning, vocational, behavioral, etc.

Speech		
Present Levels	Strengths	Weaknesses
Will answer simple what and who questions with 80% accuracy.	Communication increases when allowed to use his AAC device	Auditory processing disorder makes listening comprehension difficult
Can describe items using one adjective with 75% accuracy	Learns new words and proper usage better when taught categories	Does not seem to understand when communication partner wants him to reply
Will communicate in a full sentence (rather than one word requests) after only 1 prompt	Learns new words and proper usage faster when he can see the written word as he hears it	Proper articulation is difficult with new words

Math		
Present Levels	Strengths	Weaknesses
Utilizing counters, can add numbers 1-12 with 70% accuracy	Familiar and comfortable with using a calculator	Math is a non-preferred subject
Can label names and values of coins with 100% accuracy	Likes songs about numbers	Does not like working with numbers at a desk (does better in a natural setting)
Emerging skills with correctly using money to purchase items	Understands that items in a store need to be paid for	

Reading		
Present Levels	Strengths	Weaknesses
Can read kinder level stories	Loves to look at books	Cannot answer implicit questions
Understands first, next, last sequencing	Loves the alphabet and words	Cannot answer questions asking why
Can answer simple explicit questions with 80% accuracy	Likes to visually follow words as book is read aloud	Unable to self-formulate most reading comprehension answers. Needs multiple choice answers.
